📄 SUMMARY

Full-Stack Developer with strong expertise in React.js and Next.js, expanding into Node.js backend development. Experienced in building scalable, optimized web applications.

📁 WORK EXPERIENCE

02/2024 – 07/2024
Sari, Mazandaran, Iran

Sepanta Sepehr

React.js & Next.js Developer

Developed and maintained user interfaces using React.js and Next.js, with a focus on Server Components and SEO optimization.

10/2022 – 07/2023
Tabriz, East
Azerbaijan, Iran

Pouyesh Gostaran

React.js & Next.js Developer

- Developed multiple web projects using Next.js, including SSR/SSG pages to enhance load speed and SEO ranking
- Designed frontend architecture and structured components in a modular and maintainable way
- Fixed bugs, reviewed team code, and contributed to technical decisions related to the frontend stack

07/2022 – 10/2022
Sari, Mazandaran, Iran

Arman Pajouhan

React.js Developer

- Implemented responsive user interfaces using React.js based on UI/UX designs
- Integrated frontend components with backend APIs and handled component-level state management
- Worked closely with the team to deliver features within tight deadlines

09/2021 – 03/2022
Sari, Mazandaran, Iran

Sepehr Academy

Web Developer

- Developed web pages using HTML, CSS, and JavaScript, converting static designs into code
- Fixed UI issues and improved cross-browser and cross-device compatibility
- Started learning and applying React.js in small internal projects as a first professional step

PERSONAL PROJECTS

MahdyarDev

Portfolio

- Personal portfolio website built with Next.js and MongoDB, featuring a custom admin panel; self-hosted on a VPS with Nginx, SSL, and CI/CD pipeline via GitHub Actions.
- <https://mahdyardev.ir/>

Deep Coding

- Full-stack Udemy-like e-learning platform with role-based dashboards (User, Teacher, Admin); React/Vite frontend, Node.js/Express/MongoDB backend, self-hosted and deployed on a VPS with Nginx and CI/CD via GitHub Actions.
- <https://deep-coding.vercel.app/>

My Trip

- Full-stack flight and hotel booking platform (similar to Alibaba.ir) built with Next.js and a Node.js/Express/MongoDB backend, self-hosted on a VPS with SSL, reverse proxy, and automated CI/CD deployment.
- <https://my-trip-v01.vercel.app/>
